

Iranian pistachio is one of the best pistachios in the world. After our country, the first rank in the world are countries such as: America, Turkey, China, Syria and other countries in the world are in the next ranks. With these clarifications, because Iranian pistachio has a higher quality and has a unique taste, they are known all over the world.

Some countries also prefer to import Iranian pistachio fresh or processed. Due to the high demand of people for these valuable and nutritious foods, production in this field has increased around the world. In our country, for several years now, due to the boom in the market for buying and selling, its production has increased more than before.

Fresh pistachios are one of the foods that enter the market in late summer. This sample has been welcomed by everyone because it is tasty and its benefits are more than the properties of roasted pistachios. The most important properties of fresh pistachios are the following:

- Due to its many vitamins, it revitalizes the skin and can be used as a face mask.
- It is a rich source of protein and energy for children and pregnant women and helps the fetus grow.
- Its high fiber content will cause weight loss and slimming.
- It treats blood diseases.
- Reduces stomach pain and facilitates digestion in the body.
- It will treat anemia, constipation, and diarrhea.
